Lisa McPherson died, and her body showed evidence of extreme physical neglect. However, the fact that he was prepared to release a 'secret doctrine' in a mass-market film brings his previous statements into question. Since Scientology always works, you must have done something wrong, or you would not be undergoing a Sec Check. Note: the image above shows a cover of an audio version of Version of "Ron's Journal" - this is not the issue that contained this recording, and is for illustrative purposes only. This file is important because it confirms the existence of Operation Snow White, in Hubbard's own words (even if it doesn't mention it by name). Hubbard's basic argument throughout is that Scientology is on a vital, time-critical, mission to save the planet. The Red Volumes Download the Red Volumes These are the 18 'Red Volumes' or 'Tech Volumes' - substantial books printed in red ink on white paper, and bound in red covers (hence the name). This includes Hubbard's detailed directions concerning: 'Auditing' - that is, the one-on-one process of neutralising the supposedly long-lasting effects of traumatic memories suffered in this life (and later, also in imagined past lives) which Hubbard claimed to have psychotherapeutic and medical benefits. It is a matter of faith among Scientologists that "The Tech" (the techniques of Scientology developed by Hubbard) always and without exception works. Scientologists believe that these texts are kept secret because reading them without being properly prepared is lethally dangerous - for example, Hubbard explicitly warns that reading the OT3 level before being prepared by Scientology study will result in the student dying of pneumonia. These are techniques which are officially claimed only to "alleviate physical pain and discomfort". Unlike those, the Blue volumes are not made freely available to all Scientologists, as they contain potentially controversial doctrine and orders written and signed by Hubbard They are presented by the Church as a chronological record of the 'research' and discovery processes which supposedly led L. For example , to this document describes: "[...] the 'Bring Back to Life Assist' which has been successfully used to revive a person who has literally left his body for dead". Disillusioned, Armstrong made the papers public. Please ensure cookies are enabled and any ad blocking software is disabled for the site to function properly. Practices that are supposed to enhance the ability to study, such as word clearing and clay table demonstrations. With the correct application installed, they can also be viewed on tablets. Hubbard's collected papers were prepared for Garrison by a Scientologist called Gerry Armstrong who became increasingly disturbed by the disparity between the facts that they revealed and the presentation of Hubbard by the Church of Scientology (for example, the Church presents Hubbard as a "Nuclear Physicist" and "Medical Doctor" despite the fact he no qualifications whatsoever in those fields). They included this document, written by Hubbard around 1947, and variously called his 'Affirmations' or 'Admissions'. Scientology is laid bare by a film that skilfully knits together archive footage, testimonials from former high ranking officials and public, and dramatic reconstructions. "The Auditor" was a monthly Scientology newspaper, which was distributed to members of the church worldwide. Critics argue that, despite the fact that this treatment was demonstrably not working, the Scientologists who were trusted with her care continued to apply it until her condition deteriorated and her life was (at the very least) at immediate risk. These are believed to be a distillation of the best administrative systems that Hubbard 'researched' during previous lives which, if properly applied, can never fail. Hubbard failed to sell his screenplay (readers can judge why) and this inconsistency did not become a problem. Someone "too weak to stand" was "cured" in six minutes. When Hubbard returned to land, "Ship's Org Book" stood at five volumes. Ron Hubbard to formulate Dianetics and Scientology. They record, in chronological order, the development of what Scientologists call "The Tech". Like the previous post, "The Ship's Org Book" this document is a loose connection of Hubbard directives, this time on the subject of selling Scientology services. It includes letters which Hubbard wrote to the FBI in which he tried to take advantage of the communist witch hunt to persecute perceived enemies by making unfounded accusations against them - and the terse opinion of an FBI agent who read many of his letters... Not long after, he took to sea as "Commodore" of his own private navy. Innocence is no protection. Worse yet, offences that were committed in previous lives can supposedly be detected by the e-meter. After the success of the original "Star Wars" film in 1977 Hubbard saw an opportunity to exploit the renewed interest in Science Fiction by producing his own screenplay, entitled "Revolt in the Stars". Somewhat inconsistently, this screenplay recycles the Xenu story. Since it is also under siege by corrupt bankers and tax-seeking governments, it needs to make money and bring in new recruits. This entry dates from a time when Hubbard was in hiding, fearing arrest for his part in organising "Operation Snow White" (a huge Scientology operation to infiltrate organisations perceived to be hostile to Scientology). These books are printed in green ink on white paper, and bound in green covers. Officially all Scientologists who are 'qualified' as auditors must be IAS members - if their membership ever lapses they must re-qualify at considerable expense. This mission is so important, not normal ethical restraints do not apply - the ends justify the means.
